# Mission

Provide natural products in order to meet the need for basic nutrition and improving our quality of life and health.

- Adopting the philosophy of Hippocrates: "Let food be your medicine and your medicine be your food".

# Why Good Nutrition is Important?

Food is the foundation of our health. Everything the body needs to be healthy it gets from food we eat.

Actuals Problems...

- Too many fats and sugars are ingested.
- Foods contain lots of toxins due to additives.
- Depresses the immune system, turn people irritable or depressed, creates problems of concentration and mental lethargy.
- Most diseases are caused by poor nutrition.

# Watch What You Eat

The American consumed an average of one ton of food of which 20% was consumed in the car. Sources: The Department of Agriculture

- One in four people consume fast food every day.
- More than 10 billion donuts are consumed in the US each year.
- The Center for Disease Control has reported that on average only 14% of Americans consume at least 2 servings of fruit and at least 3 servings of vegetables a day.
- People increasingly exercise less.

# Obesity in Adults

- No state has a lower average 20% obesity.
- 9 states have an average of 20-25%.
- 13 states have a higher average of 30%.
- In the Hispanic community...
  - 78% women and 81% of the men are overweight.
- Spanish have 1.2% more chances of being overweight or obese.

# "Let your food be your medicine and your medicine be your food"

Years later we begin to understand the significance of those words.

- It is necessary to treat food with respect.
- As if it were a medicine upon which our lives
- Once it starts to feed properly following occurs:
  - Lower risk of obesity, diabetes, hypertension, heart disease, cancer and other chronic degenerative.
  - Improved physical and mental performance.
  - Permanent loss of excess body fat.
  - A longer, happier, more fulfilling life, delaying the premature biological aging, looking younger for longer.

# The importance of eating fruits and vegetables for your health

Fruits and vegetables are important to a healthy diet and its consumption helps to prevent various diseases, including heart disease, cancer, diabetes and obesity.

- The American Heart Association and other international organizations recommend that our diet includes 5 or more servings of fruits and vegetables a day.
- Vitamins, minerals and other components of fruits and vegetables are essential to human health.
- Fiber, for example, contributes to transit through the digestive tract and reduce cholesterol levels in the blood.
- Vitamins and minerals help maintain proper health
- Take action: Eat five or more servings of fruits and vegetables a day.

# Why we don't eat more fruits and vegetables?

- Convenience
- Time
- Seasons
- Flavor
- Cost
- Quality
